

Sustaine seeks a senior full-stack developer who wants to work with a great team, solve complex problems, and make a difference. Come help us make the world safe for renewable energy! Our platform models all the renewable energy options for a business and pulls the best to the top. The platform's unusual design requires creative development. This job is only for those who can handle fully remote work as part of a small team. Sustaine gives our developers an exceptional degree of professional independence, and they have to handle it exceptionally well. Do you? Then let's talk!

## General:

- Experienced full-stack developer, 5+ years experience
- Strong UI/UX
- Self starter; work both independently and with team
- Strong verbal & written communication skills
- Must be comfortable/effective in virtual office
- Sense of humor. Cookie predilection encouraged / Oreos preferred but must share with teammates...

## UI/UX Specific:

- Rapid development of wireframes to mockups to prototypes
- Photoshop or like tool

## Technical/Environment Must Have:

- PHP
- HTML5
- CSS/SCSS/SASS
- JavaScript / jQuery / AJAX
- OO Design
- Requirements interpretation
- Web Applications
- Data modeling
- Unit Testing
- Debugging

## Technical/Environment Nice to Have:

- AWS
- Java/JVM
- Vue 2/3
- JS Charting (chartJS, HighCharts...)
- Laravel PHP Framework (including blade templating)
- Composer
- Homestead/Vagrant
- PostgreSQL
- IntelliJ IDEA IDE
- Project Management skills (scheduling, task management)
- (Writing) Documentation/Specifications

Send your indication of interest to [Malcolm.Smith@Sustaine.com](mailto:Malcolm.Smith@Sustaine.com). Let's have some fun!
